

PRAJYOTH THUNGATHURTHI

Dublin, CA | +1 (415) 997-7971 | prajyoth2211@gmail.com | linkedin.com/in/prajyoth-t

SUMMARY

Senior Software Engineer with 7 years of experience building enterprise-scale Angular, Spring Boot, and TypeScript applications across healthcare, pharmaceutical research, and supply chain domains. Experienced in full-stack platform engineering, authentication systems, real-time collaboration, enterprise dashboards, AI-assisted workflows, and regulated document management systems. Proven track record delivering scalable solutions across frontend, backend, search infrastructure, and CI/CD environments while working closely with business users and cross-functional teams.

SKILLS

Frontend: Angular 19+, TypeScript, RxJS, Reactive Forms, React.js, Next.js 14, JavaScript, HTML5, CSS3, SCSS, Angular CDK, D3.js, Three.js, AG-Grid

Backend: Java 21, Spring Boot 3, Node.js, Express.js, REST APIs, OpenAPI, Flyway, PostgreSQL

Search & Data: OpenSearch, PostgreSQL, MongoDB

Authentication & Security: JWT Authentication, OAuth2/SSO, Janus Authentication, Route Guards, HTTP Interceptors

Infrastructure & DevOps: GitLab CI/CD, Docker, Kubernetes, Datadog RUM, Feature Flags, WebSockets

Testing: Jest, Unit Testing, Playwright

Other: Microservices, Agile, Git, JIRA, Enterprise Dashboard Architecture, PDF Generation, AI Plugin Integration

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Genentech, South San Francisco, CA

Feb 2025 – Present

- Architected and delivered a PDF generation pipeline for regulated IACUC protocol documents using jsPDF, supporting 14 protocol form types, version comparison workflows, and bulk exports.
- Built end-to-end animal ordering workflows across Angular 19 frontend and Spring Boot backend, supporting multiple order types and lifecycle states for vivarium operations.
- Designed and implemented OpenSearch-powered dashboards with advanced filtering, sorting, wildcard search, date range filtering, and custom user views.

- Owned JWT authentication infrastructure including HTTP interceptors, automatic token refresh, Janus OAuth SSO integration, and role-based route guards across multiple enterprise applications.
- Led Keycloak-to-Janus OAuth2 migration for legacy APG applications, resolving redirect loops, improving app stability, and configuring multi-environment authentication flows.
- Implemented WebSocket-based real-time collaboration features for concurrent protocol editing with authenticated user presence tracking.
- Built integration workflows between AI-assisted authoring plugins and host Angular applications using localStorage-based context passing and cross-application communication.
- Integrated AI-assisted protocol authoring workflows with contextual side-panel plugins and field-level suggestions.
- Developed protocol audit trail and side-by-side version comparison systems for compliance review workflows.
- Led Angular upgrade preparation by authoring 179 unit tests across critical infrastructure components and services.
- Integrated Datadog Real User Monitoring (RUM) for improved production debugging and observability.
- Owned frontend production build and asset pipeline fixes including font/icon bundling and deployment stability improvements.
- Collaborated closely with research staff, reviewers, and backend teams to troubleshoot production issues and deliver enterprise-scale features.

Senior Front-End Engineer | Apple Inc., Sunnyvale, CA

Jul 2022 – Feb 2025

- Led frontend development for supply chain applications using Angular 15 and Angular 13, delivering scalable single-page applications.
- Developed enterprise dashboards visualizing Apple product supply chain operations.
- Worked extensively with AG-Grid and Highcharts for data-heavy enterprise applications.
- Built reusable Angular components and modules to improve maintainability and future framework upgrades.
- Collaborated with offshore teams and cross-functional stakeholders to deliver projects on schedule.
- Worked with Angular CLI, Observables, routing, guards, and component-based architecture.

Front-End Developer | Kaiser Permanente, Pleasanton, CA

Jan 2021 – Jun 2022

- Developed Angular and React.js components for patient-doctor interaction platforms.
- Built reusable TypeScript components and integrated REST APIs using Angular architecture.
- Enhanced user experience through improved navigation flows, wireframes, and responsive UI design.
- Debugged and deployed applications using JIRA and WebSphere while ensuring cross-browser compatibility.

Web Developer | CooperVision, West Henrietta, NY

May 2020 – Oct 2020

- Built responsive admin portals using Angular 9, Bootstrap, and PrimeNG.
- Developed backend APIs using Express.js and Node.js for improved data retrieval.
- Implemented server-side scripting and asynchronous operations using Node.js.

UI/Web Developer | American Express, Phoenix, AZ

May 2019 – May 2020

- Migrated enterprise applications from Polymer 1 to Polymer 3 using TypeScript and Lit Elements.
- Developed searchable employee hierarchy components and analytics dashboards.
- Collaborated with API and data science teams to deliver high-quality enterprise applications.

SELECTED ENGINEERING HIGHLIGHTS

- Delivered 628+ commits across Angular, Spring Boot, OpenSearch, PostgreSQL, and CI/CD repositories.
- Built enterprise-grade PDF rendering and protocol comparison systems for compliance-sensitive workflows.
- Implemented authentication migrations and SSO integrations across multiple enterprise Angular applications.
- Led modernization efforts for vivarium and protocol management platforms used in pharmaceutical research.
- Integrated AI-assisted workflows and real-time collaboration infrastructure into enterprise applications.
- Scoped modernization strategy for legacy Oracle and Java Swing systems into modern Angular + Spring Boot architecture.

EDUCATION

- Ph.D. in Information Technology (In Progress) | University of the Cumberlands
- M.S. in Computer Science | Northwestern Polytechnic University | 2015 – 2016
- B.S. in Computer Science Engineering | Guru Nanak Institutions, JNTUH | 2011 – 2015
